Settlement Reconciliation Report

Merchant	Kalyani Retail Private Limited
GSTIN	27AABCK1234M1Z5
Reconciliation period	July 2026 (synthetic)
Run identifier	run_20260904_173343_99d176
Generated	04 September 2026, 17:33
Records processed	149
Prepared by	Sadhaka reconciliation engine v0.4.0

This report reconciles settlement data reported by the payment aggregator against the merchant's bank statement and internal order records, across five stages: bank-to-batch matching, batch-to-order verification, GST/input-tax-credit reconciliation, forward cash positioning, and double-entry journal generation. Every figure in this document is read from the reconciliation engine's audit trail; none is recalculated for presentation.

Note on data: all transaction data in this report is synthetically generated for demonstration and testing purposes. No real customer, merchant, or payment data is used.

1. Executive Summary

Rs 5,05,625.65	Rs 5,44,175.19	96.94%	8
Credited by bank	Settled gross	Value verified clean	Exceptions needing action

Across 11 settlement batches and 11 bank credits, 15 exceptions were raised: 8 require review (worth Rs 30,411.64) and 7 are explained variances requiring no action (worth Rs 52,630.77) — timing lags, reserve holds, and rounding, each individually accounted for in Section 3.

Self-test against 9 deliberately planted data faults: 9 detected (100.0% recall). 2 of 2 ambiguous-match traps correctly avoided.

Match dimension	Rate	Basis
Bank credit to settlement batch	100.00%	11 of 11 bank credits
Transaction to order	96.88%	62 of 64 settled transactions verified with no variance
By settled value	96.94%	Rs 5,27,517.57 of Rs 5,44,175.19 settled value
By banked value	100.00%	Rs 5,05,625.65 of Rs 5,05,625.65 banked

2. Reconciliation of Funds

Line item	Amount
Settled gross (before deductions)	Rs 5,44,175.19
Less: gateway fees (MDR)	(Rs 6,949.90)
Less: GST on fees	(Rs 1,240.22)
Net expected	Rs 5,05,625.65
Actually credited by bank	Rs 5,05,625.65
Variance	Rs 0.00 — banked value fully accounted for

The gap between settled gross and banked value is a cost of service (MDR) plus a recoverable tax (GST on that fee), not a discount. Both are booked as separate ledger lines in Section 5 rather than netted against revenue, because netting them would silently forfeit the input tax credit on the GST component.

3. Exception Schedule

Every variance the engine could not silently reconcile, with the reason recorded at the time of decision. Split into items requiring action and items the engine explains as expected settlement behaviour, so review effort is not spent re-deriving what is already understood.

3.1 Actionable exceptions — review required

Code	Entity	Reason recorded	Value
CHARGEBACK	disp_VWFzkmL2dDx5SF	Chargeback debit of Rs 17,811.14 against payment pay_JRzhbuXMZ5f0pK (dispute disp_VWFzkmL2dDx5SF), comprising the disputed value Rs 17,061.14 plus a handling fee of Rs 750.00. Debited in settlement setl_xVJGyOphTExlqq.	Rs 17,811.14
PARTIAL_PAYMENT	rfnd_xp07LjfP4tOPhR	Refund of Rs 4,236.77 against payment pay_0Fmxk754LEgw9Y (order order_2007, original Rs 9,514.70). Debited in settlement setl_oOgKUivuNZQ8DI, which is a later batch than the original sale — expected behaviour for a refund issued after the sale settled.	Rs 4,236.77
PARTIAL_PAYMENT	rfnd_9jsWFHTGP2MLjI	Refund of Rs 3,967.55 against payment pay_GhnuKoneNo41eo (order order_2009, original Rs 12,507.96). Debited in settlement setl_xVJGyOphTExlqq, which is a later batch than the original sale — expected behaviour for a refund issued after the sale settled.	Rs 3,967.55
PARTIAL_PAYMENT	rfnd_xXYPZTQGOAwln	Refund of Rs 3,694.68 against payment pay_LUieV0vWqaTZJO (order order_2043, original Rs 10,310.14). Debited in settlement setl_xVJGyOphTExlqq, which is a later batch than the original sale — expected behaviour for a refund issued after the sale settled.	Rs 3,694.68
PARTIAL_PAYMENT	rfnd_cwS8LUWoo7W4mQ	Refund of Rs 649.28 against payment pay_5GdF0ee1z6JJcf (order order_2013, original Rs 1,292.32). Debited in settlement setl_xVJGyOphTExlqq, which is a later batch than the original sale — expected behaviour for a refund issued after the sale settled.	Rs 649.28
FEE_DEDUCTION	pay_DSBbszpPwlv9lv	MDR charged Rs 184.00 on Rs 7,666.72 (2.400%) but the contracted rate for 'card' is 2.00%, which would be Rs 153.33. Overcharged by Rs 30.67.	Rs 30.67
TAX_DEDUCTION	pay_gSB3tjhMKSxLSF	GST charged Rs 21.58 on a fee of Rs 179.82 is 12.00%, not the statutory 18% which would be Rs 32.37. Difference -Rs 10.79. Understated GST reduces the input tax credit the merchant can legitimately claim.	-Rs 10.79
TAX_DEDUCTION	settlement_gst_total	Across all settled transactions, GST actually deducted was Rs 1,240.22, but 18% of the Rs 6,949.90 of fees charged would be Rs 1,250.98 — GST is understated by Rs 10.76. Every rupee of understated GST is a rupee of input tax credit the merchant cannot claim.	-Rs 10.76

3.2 Explained variances — no action required

Code	Entity	Reason recorded	Value
TIMING_LAG	bnk_v1t9vyVFg	Matched, but the credit landed 3 days after the settlement was created, outside the expected 2-day window. Amount agrees exactly, so this is a bank-side delay, not missing money. (settlement setl_XirZRIRBaepZIT)	Rs 20,440.26

Code	Entity	Reason recorded	Value
ON_HOLD	pay_BHs8YGPI5g2q3U	Transaction pay_BHs8YGPI5g2q3U (Rs 16,296.56) is flagged on_hold and withheld from the payout as a reserve. Correctly excluded from the settled total — this is not missing money.	Rs 16,296.56
NOT_YET_SETTLED	order_2006	Order order_2006 (Rs 7,271.39, captured 2026-07-10 14:33:00) appears in no settlement batch. Within a T+2 cycle this is expected for recent orders — the payout has not been generated yet, so this is not missing money.	Rs 7,271.39
NOT_YET_SETTLED	order_2053	Order order_2053 (Rs 4,534.34, captured 2026-07-09 04:24:00) appears in no settlement batch. Within a T+2 cycle this is expected for recent orders — the payout has not been generated yet, so this is not missing money.	Rs 4,534.34
TIMING_LAG	bnk_CqpgxrMp1j	Matched on amount and date, but the bank reference '478833337H8' does not exactly correspond to the settlement UTR '478833337h83' (prefix). Reference drift of this kind is routine; the match itself is sound. (settlement setl_ohoNMdZEHNJSsa)	Rs 3,830.38
NOT_YET_SETTLED	order_2022	Order order_2022 (Rs 256.41, captured 2026-07-05 06:27:00) appears in no settlement batch. Within a T+2 cycle this is expected for recent orders — the payout has not been generated yet, so this is not missing money.	Rs 256.41
ROUNDING	RZP/202607/119857	Monthly GST invoice RZP/202607/119857 declares tax of Rs 1,238.79; the sum of per-transaction GST across all settled rows is Rs 1,240.22. Difference -Rs 1.43, within the Rs 5.00 monthly tolerance. This is accumulated per-transaction rounding, not an error —...	-Rs 1.43

3.3 Variance code reference

Code	Meaning
CHARGEBACK	Dispute debit reduces the payout, typically in a batch later than the original sale.
DUPLICATE_CANDIDATE	More than one plausible counterpart; refusing to guess which.
FEE_DEDUCTION	MDR/platform fee differs from the contracted rate for this instrument.
NOT_YET_SETTLED	Order captured but not yet included in any settlement batch (cycle not elapsed).
ON_HOLD	Amount captured but withheld (reserve/hold); correctly excluded from this payout.
PARTIAL_PAYMENT	Refund or partial refund adjusts a prior sale, often in a later batch.
ROUNDING	Sub-rupee drift from per-transaction fee/GST rounding.
TAX_DEDUCTION	GST-on-MDR differs from 18% of the charged fee.
TIMING_LAG	Correct match, but the bank credit landed outside the expected settlement window.
UNEXPLAINED	Residual variance with no attributable cause. Escalate.

4. GST and Input Tax Credit Statement

GST on the gateway fee is deducted per transaction inside each settlement, but is claimable as input tax credit only against the supplier's monthly tax invoice, and only once that invoice appears in the recipient's GSTR-2B. This section reconciles the two independently.

Invoice RZP/202607/119857 — period 2026-07 — ITC CLAIMABLE

Item	Amount
Taxable value on invoice	Rs 6,949.90
Tax declared on invoice	Rs 1,238.79
Tax summed from settlements	Rs 1,240.22
Difference	-Rs 1.43 (within tolerance)
Reflected in GSTR-2B	Yes
ITC claimable this period	Rs 1,238.79

Effective rates by payment instrument

Instrument	Count	Gross	Effective MDR	Contracted	Effective GST
card	24	Rs 2,49,652.04	2.012%	2.00%	17.79%
netbanking	9	Rs 59,102.68	2.000%	2.00%	18.00%
upi	26	Rs 1,98,213.16	0.000%	0.00%	—
wallet	5	Rs 37,207.31	2.000%	2.00%	18.00%

UPI carries zero MDR by statute (Section 10A, Payment and Settlement Systems Act), so nil fee and nil GST on those rows is correct and is not a missing deduction.

5. Journal Entries and Trial Balance

13 balanced double-entry postings were generated from this reconciliation. Trial balance ties.

Code	Account	Debit	Credit
1010	Bank — Current Account	Rs 5,05,625.65	
1100	Trade Receivables	Rs 16,296.56	
1210	Razorpay Clearing Account		Rs 5,60,471.75
1310	Input GST Recoverable	Rs 1,240.22	Rs 1.43
4100	Sales Returns & Refunds	Rs 12,548.28	
5210	Payment Gateway Charges	Rs 6,949.90	
5220	Chargeback Losses	Rs 17,061.14	
5230	Dispute Handling Fees	Rs 750.00	
5900	Rounding Differences	Rs 1.43	
	TOTAL	Rs 5,60,473.18	Rs 5,60,473.18

Sample postings

JV-0001 2026-07-03 Razorpay settlement setl_4jB6nBvbdFo9xb credited to bank as Rs 47,442.78 covering 6 transaction(s) gross Rs 47,851.83, net of gateway charge

Account	Debit	Credit
Bank — Current Account	Rs 47,442.78	
Payment Gateway Charges	Rs 346.65	
Input GST Recoverable	Rs 62.40	
Razorpay Clearing Account		Rs 47,851.83

JV-0002 2026-07-04 Razorpay settlement setl_XirZrIRBaepZIT credited to bank as Rs 20,440.26 covering 3 transaction(s) gross Rs 20,554.43, net of gateway charge

Account	Debit	Credit
Bank — Current Account	Rs 20,440.26	
Payment Gateway Charges	Rs 96.75	
Input GST Recoverable	Rs 17.42	
Razorpay Clearing Account		Rs 20,554.43

JV-0003 2026-07-05 Razorpay settlement setl_ohoNMdZEHNJSsa credited to bank as Rs 3,830.38 covering 3 transaction(s) gross Rs 3,867.58, net of gateway charges,

Account	Debit	Credit
Bank — Current Account	Rs 3,830.38	
Payment Gateway Charges	Rs 31.53	
Input GST Recoverable	Rs 5.67	
Razorpay Clearing Account		Rs 3,867.58

JV-0004 2026-07-06 Razorpay settlement setl_IPGw7HWFb2cxxU credited to bank as Rs 76,284.93 covering 8 transaction(s) gross Rs 77,357.09, net of gateway charge

Account	Debit	Credit
Bank — Current Account	Rs 76,284.93	
Payment Gateway Charges	Rs 908.60	
Input GST Recoverable	Rs 163.56	
Razorpay Clearing Account		Rs 77,357.09

JV-0005 2026-07-07 Razorpay settlement setl_oOgKUivuNZQ8DI credited to bank as Rs 30,186.10 covering 5 transaction(s) gross Rs 35,079.27, net of gateway charge

Account	Debit	Credit
Bank — Current Account	Rs 30,186.10	
Payment Gateway Charges	Rs 556.27	
Input GST Recoverable	Rs 100.13	
Sales Returns & Refunds	Rs 4,236.77	
Razorpay Clearing Account		Rs 35,079.27

JV-0006 2026-07-08 Razorpay settlement setl_scmc5F9HpUlwW1 credited to bank as Rs 1,27,884.35 covering 12 transaction(s) gross Rs 1,29,799.89, net of gateway c

Account	Debit	Credit
Bank — Current Account	Rs 1,27,884.35	
Payment Gateway Charges	Rs 1,623.34	
Input GST Recoverable	Rs 292.20	
Razorpay Clearing Account		Rs 1,29,799.89

...and 7 further entries in journal_entries.csv (full export accompanying this report).

6. Forward Cash Position

Expected Rs 11,698.72 to land over the next 14 days, from 4 captured-but-unsettled order(s) and 0 settlement(s) awaiting bank credit. Confidence band: **moderate** — settlement timing varies by roughly 0.86 days; expect projected dates to move by a day either way

Lag stage	Median	90th pct	Observations
Capture to settlement	2.0 days	2 days	64
Settlement to bank credit	0 days	0 days	11

This forecast projects only money that already exists — captured orders and created settlements. Future sales are not predicted, since demand forecasting from limited history would produce a fabricated figure wearing a confidence interval.

At risk — On Hold: Rs 16,296.56

1 transaction(s) worth Rs 16,296.56 are flagged on hold as a risk reserve. This money exists but is not scheduled to land, so it is excluded from the forecast rather than counted as delayed.

7. Appendix — Engine Verification

The matching logic underlying this report was tested adversarially before being applied to this data: known faults were programmatically injected at varying magnitudes and the detection rate measured with statistical confidence intervals, rather than relying solely on hand-picked test cases.

Profile: **quick** 270 injected faults across 9 fault types 212 match decisions scored for confidence calibration.

Fault type tested	Detected	Floor	Verdict
MDR overcharged on one transaction	100%	Rs 0.09	floor established
GST on the fee understated	100%	Rs 0.09	underpowered
Money skimmed from the bank credit	100%	Rs 0.01	underpowered
Settled gross inflated above the order	100%	Rs 0.01	floor established
Settled transaction with no matching order	100%	Rs 0.01	floor established
Settlement created, bank credit never arrived	100%	—	underpowered
The same settlement credited twice	100%	—	underpowered
Bank credit delayed beyond the window	100%	3.0 days	floor established
Bank reference bears no relation to the UTR	100%	—	underpowered

Confidence calibration: expected calibration error 0.1316, Brier score 0.0317. Underconfident: the engine is right more often than it claims (expected calibration error 0.132). This is the safe direction to be wrong in — it sends work to a human that a human did not need to do.

No blind spots identified at the magnitudes tested — every fault type reached a reliable detection floor or was explicitly reported as statistically underpowered rather than falsely claimed reliable.

This report is generated output of the Sadhaka reconciliation engine and is provided for review purposes. It does not constitute professional accounting, tax, or audit advice. All figures should be independently verified before being relied upon for statutory filings.
